4, Balaji Road,  
Indore

17 February, 2022

My dear friend,

I am fine here and hope you are also quite well, in good health and happy there. I hope your preparation for competitive exam is going very well. I have no doubt in your capability. I know that you are doing great preparation for competitive exam. I know that you will crack the examination but I want to tell you something that please you read English and general knowledge a lot. In English specially English grammar. Because in most of examinations, grammar based questions is definitely asked. General knowledge is also important. For increasing your general knowledge, you can take help from newspapers, many books based on general knowledge. It will definitely help you to crack the exam. My good wishes is also with you.

Yours affectionately

Shweta.

"The Importance of Games and Sports"

M  
P  
B  
S  
E

No doubt, Games is very essential for us. It keeps us healthy. It freshes our mind. There are many types of game which we can play. But we can divide the games into two main categories. Indoor games and Outdoor game. Indoor game like chess, table tennis etc. Outdoor games like Football, cricket, badminton etc. There is a saying "A healthy mind posses is in the healthy person So we say that 'A healthy body possess a healthy mind.' In my opinion, for students games are necessary. Students should play games, so their body and mind keeps healthy. When we play the games like chess it increases our memory and increase our focus and concentration which also helps in study. If we want to keep our body healthy then it is necessary to play games. In our country there are many player in different fields, who who plays amazing. In olympics, Player of India like P.V Sindhu, Neeraj Chopra etc give their best and also got the position in olympic and 'Make the India proud' in the world. Now India is known by the name of these players. The Government should give an opportunity to promote them who wants to play. Really, Games and sports is very important in our lives.

Ans. of Q. no. 13Ans. (i)**M****P****B****S****E**

The child labour should be eliminated because it takes away the childhood and prospect of elementary education from the children. It is a very shameful condition that India has the maximum numbers of child labour in world. It is an inhuman practice. A child needs love and care. All the major industries in India employed a large no. of child workers. Bangle making industries in Ferozabad Carpet industry in Mirzapur Mirzapur and Fire work factory in Sivkasi. Thousands of worker are working there.

In order to eliminate this problem, the Government should enact laws faithfully. Apart from this, the parents must aware of the consequences of working at harmful environment. The public must be aware of the fact that child labour is a punishable offense.

प्रश्न क्र.

Ans. 11✓  
(iii)

In this regard, Eco has stated in his own words that the life of every person have some empty space period with no important jobs. He says that he did most of his writing works during these free intervals of time. The important part is that he write on the same lines and on the same topic peace, non-violence etc. He saved his time and could write a lot in ~~short~~ short period of time. He consider himself as the academic scholar first who writes novels on Sunday and on week days attending their academic conferences and does other non-fictional works. That is the secret of his writing.

Antarctica is the place to go to understand the earth's present, past and future because the world's geological records and history is trapped in Antarctica. Antarctica also gives an idea, how the earth would have been like million of years ago and how it got divided into various land masses. It reveals the development of continents to get a grasp of where the humankind came from and where it could possibly be heading. The melting and colliding of land masses gives an idea that how our future is going to be, if we continue the interference in the working of nature. The most important thing is that the Antarctic holds half a million years old carbon track records in its layer of ice. Thus, the above statement is relevant.
