"The Study of Three Languages"

Language is a medium to express our feelings and ideas to other person. Language plays an important ^{role} in our life because by learning English we develop our skills and thought without ^{learning} languages we can't talk with anyone.

There are many languages in the world that we use to express feelings. English is an international language and Hindi is our national language. By learning different-different languages students develop their knowledge in many different cultures and develop skills.

In ~~India~~ ~~the~~ India in many different states we use three languages formula. First is The English (International language), second is Hindi (national language) and third is state language like (Urdu, Tamil, Marathi, Gujarati, Kannad, Malayalam and Urdu etc).

Students have to learn three languages because it can help to learn our cultures and rituals and history and literature but the biggest drawback of studying three languages is student put burden because

रुन क्र.

they have to study all the three language deeply like (their history, their cultures, their literature). So the three language is not so good or else we can't call it formula totally wrong because it helps to learn many things. so we can say that the study of three language is important for student.
