In Modern world Science and Technology are the major keys for the development and inventions. They are playing a very big role in all the field. Today Science and technology have revolutionary things for the mankind. In our day to day life also they are very necessary. From the last few years we have seen unbelievable miracles of science, from going to Moon or Mars, Studying nature or any other thing. From our small to big work Technology helps us in everything either it could be mass Communication, e-commerce, e-banking etc. Computers, Supercomputers, Internet all are linked to

प्रश्न क्र.

technology. If we research on technology clearly we can see its base is always science.

In today's world science and technology are very vast, helpful, time saving, life saving and many more.

From the medicine of the person to the mobile all comes under it. As it is having all these merits there are some demerits also, like - dependency of people on gadgets, also sometimes it is unsafe for children. So we have to work very carefully upon it, we have to preserve it, and do progress. *that is proper paragraph formed.*
