Answers of Question $\Rightarrow 1$

1. By non-trading concerns
2. Super profit
3. 3:1
4. his share of goodwill
5. Partner's capital etc

Answers of Question $\Rightarrow 2$

1. Receipts & payments etc
2. when earning profit / At the time of profit
3. The new ratio will be 5:2
4. Compulsory Dissolution
5. Transferrable Debentures

यो

Answers of question $\Rightarrow 3$

- (i) Drawings
- (ii) Revaluation a/c
- (iii) Profit
- (iv) Realisation a/c
- (v) 1:1 2:1

Answers of question $\Rightarrow 4$

- B** (a) Only Individuals \Rightarrow Can become partners
- S** (b) gaining ratio is equal to \Rightarrow New ratio - old ratio
- (c) Assets are shown in realization a/c \Rightarrow At Book value
- E** (d) Purchase of fixed Assets \Rightarrow Investing activities
- (e) Discount on issue of debentures \Rightarrow Fictitious Assets

Answers of question $\Rightarrow 5$

- (i) False
- (ii) True
- (iii) True
- (iv) True
- (v) False

Answer of Question \Rightarrow 15

Characteristics of partnership

B
S
E

(i) Agreement \Rightarrow Partnership is formed out of agreement. Agreement should be legal and valid. It may be in oral or written.

(ii) Competency to contract \Rightarrow It is necessary that partner should competent to contract. Lunatic and insolvent can't be admitted as partner.

(iii) Business \Rightarrow Partnership is always formed for carrying out some trade, occupation and profession. Business should be legal.

(iv) Unlimited liability \Rightarrow The liability of partners is unlimited. It means personal assets of partners can be utilized for payment of liabilities.

Answer of question \Rightarrow 16

Given,

Old Ratio of Anil and Vishal is 3 : 2
 Sumit is admitted for $\frac{1}{5}$ th share
 New ratio = ?

We know that,

Total share of firm is 1
 Sumit admitted for $\frac{1}{5}$ th share

So, Total share of firm will be $- 1 - \frac{1}{5}$

$$\Rightarrow \frac{5-1}{5}$$

$$\Rightarrow \frac{4}{5}$$

New Ratio of Anil will be $\Rightarrow \frac{3}{5} \times \frac{4}{5} = \frac{12}{25}$

New Ratio of Vishal will be $\Rightarrow \frac{2}{5} \times \frac{4}{5} = \frac{8}{25}$

& Sumit share $\Rightarrow \frac{1}{5} \times \frac{5}{5} = \frac{5}{25}$

So New ratio between Anil, Vishal & Sumit is

$$\boxed{12 : 8 : 5}$$

प्रश्न क्र.

Answer of Question \Rightarrow 17 [Cor]

Given,

Avg profit \Rightarrow 84000

Capital Employed \Rightarrow 5,00,000

Rate of return \Rightarrow 12%

Remuneration \Rightarrow 120000

Normal profit \Rightarrow $\frac{\text{Capital Employed} \times \text{Rate of return}}{100}$

\Rightarrow $\frac{5,00,000 \times 12}{100}$

\Rightarrow ₹ 60000

B
S
E

Avg profit - Remuneration = Actual Avg profit

\Rightarrow 84000 - 12000

\Rightarrow ₹ 72000

Super profit = Actual Avg profit - Normal profit

\Rightarrow 72000 - 60000

\Rightarrow ₹ 12000

Capitalization of Super profit = $\frac{\text{Super profit} \times 100}{\text{Rate of return}}$

$= \frac{12000 \times 100}{102}$

$= ₹ 100000$

1. Goodwill = ₹ 100000

Answer of Question \Rightarrow 18

Characteristics of Company

- (i) Artificial person \Rightarrow A Company is an artificial person created by law. It can own property on its name. It has to fulfil all statutory obligations like person.
- (ii) Perpetual Existence \Rightarrow A Company has perpetual existence. Its working is not affected by death or admission of members. It takes birth from law and winding up i.e. effaced by law.
- (iii) Area of operations \Rightarrow Company's area of operations are governed by its important document known as Memorandum of Associations. No company can work against Memorandum of Associations.
- (iv) Liability \Rightarrow The liability of members is limited to the shares ^{subscribed} held by them. Therefore members enjoys limited liability. Personal assets of members can't be utilised for payment of liabilities.

Answer of Question \Rightarrow 19

Basis	Shares	Debentures
Consideration	Dividend is paid on shares	Interest is paid on debentures
Rate	Rate of dividend is not fixed	Rate of interest is fixed
Types	Shares are of two types - 1) Equity Shares 2) preference shares	Debentures are of many types.
Issue on discount	There are restriction on issue of shares on discount	There are no such restrictions.

Answer of Question \Rightarrow 20 [10x]

Journal Entries

(In the books of ...)

Date	Particulars	Dr. Amt	Cr. Amt
	Share Capital etc		

Answer of Question \Rightarrow 20

Methods of Redemption of Debentures.

- i) By annual drawings \Rightarrow In this method debentures are redeemed in instalments. But which type of debentures are redeemed first. To solve this problem lottery method is used. It This method is also known as redemption by lottery method

(ii) By Conversion into shares \Rightarrow Company can provide debentureholders to convert their holding into shares at the time of issue. Debentures ~~and~~ redemption made by conversion into shares do not require creation of D.R.R.

(iii) By purchase in open market \Rightarrow Company can redeem its debenture by purchasing own debentures in market. In this way the net effect is nullified. ~~as~~ Generally company purchases its debentures on market price.

B
S
E (iv) Redemption in lumpsum payment \Rightarrow Company also redeems its debentures on lumpsum payment at the maturity of period or before maturity. It consists of two methods -
(i) By redemption out of capital
(ii) Redemption out of accumulated profits.

Answer of Question \Rightarrow 21 [or]

Limitations of Financial Statements.

(i) Lacks precision \Rightarrow The facts and figures shown in financial statements lacks accuracy and precision.

प्रश्न क्र.

(iii) Lack of Qualitative aspects \Rightarrow Financial statements show only quantitative aspects. It doesn't show satisfaction of employees, efficiency in management, honesty etc. which is very important.

(iii) Based on past events $=$ It is based on past year data. So it fails to disclose the future possibilities or events.

Q. 11

(iv) Effect of changes in price level \Rightarrow The price level changes every year. So comparison between two periods can't be done with accuracy.

Answer of Question \Rightarrow 11

Basis Fixed Capital a/c
Current a/c Current a/c is prepared separately

Balance It always has credit balance

Changes ^{fixed} Capital a/c doesn't change except additional capital is brought

Fluctuating Capital a/c
 No current a/c is not prepared.

It may have debit & or credit balance

^{Capital} Fluctuating a/c changes every year.

प्रश्न क्र.

Answer of Question \Rightarrow 12

Basis Accounting Treatment	Dissolution of partnership Revaluation a/c is prepared	Dissolution of partnership Realisation a/c is prepared
Termination of business	Business is not terminated. Remaining partners can continue business	Business of firm is completely terminated
Court's Intervention	Court doesn't intervene at the time of dissolution of partnership.	Court's can intervene at dissolution of partnership firm

Answer of Question \Rightarrow 13

Ans :- According to partnership Act :- A firm ^{is} dissolved compulsorily on the following circumstances :

- (i) Insolvent \Rightarrow If all the partner's except one ~~is~~ are declared insolvent.
- (ii) Illegal business \Rightarrow If the business conducted by all partners is declared illegal.
- (iii) Exceeds Maximum partners limit \Rightarrow If partners in the partnership admitted exceeds the maximum limit.

प्रश्न क्र

Answer of Question \Rightarrow 14

Basis transfer	Share Share is transferred at full value	Stock Stock can be transferred in parts
Fully/partly paid up	Share may be partly paid up	Stock is always fully paid up
Registered	Share is always registered	Stock is not registered

Answer of Question \Rightarrow 6

Non-trading Organisation ~~is~~ ^{is} that organisation which main motive is not to earn profit but to provide social services.

Non-trading Organisation financial statement includes (a) Receipts & payments a/c
(b) Income & expenditure a/c
(c) Balance sheet

Answer of Question \Rightarrow 7

Sacrificing ratio is that ratio in which old partners give up their shares of profit in the favour of new partner. It is calculated to divide the premium of goodwill between old partners' capital a/c

प्रश्न क्र.

Formula of Sacrificing Ratio is

Old Ratio - New Ratio

Answer of Question $\Rightarrow 8$

Quick Ratio is the relation between quick assets or liquid assets and current liabilities. This ratio is calculated to know the short term repayment capacity of firm to pay its current liabilities in one month or earlier. The ideal ratio is 1:1

**B
S
E**

Formula of Quick Ratio = $\frac{\text{Liquid Assets}}{\text{Current Liabilities}}$

Answer of Question $\Rightarrow 9$ [CO r]

Limitations of financial analysis

(i) Lack of qualitative aspect \Rightarrow Financial analysis only show monetary facts but business is affected by non-monetary facts also which is not shown by financial analysis

(ii) Distrustful results \Rightarrow Financial analysis is based on financial statement. If there is has been carelessness in making financial statements the results of financial analysis will be wrong

Answer of Question \Rightarrow 10

Gross profit ratio is the type of profitability ratios. It shows the relation between Gross profit and Net Sales. It shows that how much profit is earned through sales. This ratio is indicated in terms of percentage.

Formula for calculation Gross profit Ratio :-

$$\frac{\text{Gross profit} \times 100}{\text{Net Sales}}$$

Answer of Question \Rightarrow 22

Basis	Receipts & payments a/c	Income & Expenditure a/c
Type of a/c	It is a real a/c	It is a nominal a/c
Nature of items	In this a/c items of both Capital nature and revenue nature are shown	In this a/c only items of revenue nature are shown.
Closing Balance	Its closing balance shows closing cash or bank balance	Its closing balance represents either surplus or deficit
Nature of Sides	Incomes are shown in debit side and expenses are shown in credit side	Incomes are shown in credit side and expenses are shown in debit side
	In this a/c adjustments regarding outstanding expenses and accrued incomes are not made	In this a/c adjustments regarding accrued incomes and outstanding expenses are made

	<u>2,38,000</u>	<u>1,79,000</u>	<u>1,00,000</u>		<u>2,38,000</u>	<u>1,79,000</u>	<u>1,00,000</u>

प्रश्न क्र.

Journal Entries

Case (II)

(In the books of Kumar Ltd)

Date	Particular	Lf	De. Amt	Cr. Amt	
	Assets a/c De.		6,30,000		
	To Bhanu Oil Ltd			6,30,000	
	[Being Assets purchased from Bhanu Oil Ltd]				
	Bhanu Oil Ltd De.		6,30,000		
	To Equity Shares ^{capital} a/c			525000	
	To Security premium reserve a/c			105000	
	Total		12,60,000	12,60,000	

W.No

Issuing equity shares at premium =>

$\frac{\text{Total no. of shares issued} \times \text{Purchase Consideration}}{\text{Value of share}}$

$\Rightarrow \frac{6,30,000}{100 + 20}$

$\Rightarrow \frac{6,30,000}{120}$

=> 5250 shares

Share issued at face value => $5250 \times 100 = \text{₹} 525000$

Security premium reserve => $5250 \times 20 = \text{₹} 105000$

प्रश्न क्र.

Answer of Question $\Rightarrow 25$ [Or]

Given,

$$C.R = 3.5 : 1$$

$$W.C = 90000$$

$$\text{Current assets} = ?$$

$$\text{current liabilities} = ?$$

We know that,

$$\text{Current Ratio} = \frac{\text{Current Assets}}{\text{Current Liabilities}}$$

Let x the number

$$\text{So Current Assets} \Rightarrow 3.5x$$

$$\text{Current Liabilities} = 1x.$$

$$\text{Working Capital} = \text{Current Assets} - \text{Current Liabilities}$$

$$90000 = 3.5x - 1x$$

$$90000 = 2.5x$$

$$\frac{90000}{2.5} = x$$

$$x = 36000$$

$$\text{So Current Assets} = 3.5x$$

$$\Rightarrow 3.5 \times 36000$$

$$\Rightarrow \text{₹ } 1,26,000$$

$$\text{Current Liabilities} = 1x$$

$$= 1 \times 36000$$

$$= \text{₹ } 36000$$

Question

Answer of Question = 26 [08]

Examples of Cashflow Statement

Cashflow Statement is tool of financial analysis which shows changes in cash position of business. It shows how much cash is used and how much cash is sources of receipts of cash. It is classified in three headings (i) operating activities (ii) Investing activities (iii) financing activities

Examples of Cash inflow

- (i) Decrease in ~~Debit~~ Assets - Add in operating activity
- (ii) Increase in liabilities - Add in operating activity
- (iii) Sale of fixed assets - Add in Investing activity
- (iv) Issue of shares - Add in financing activity
- (v) Rent received - Add in Investing Activity

Examples of Cash outflow

- (i) Decrease in liabilities \Rightarrow less in operating activity
- (ii) Increase in Assets \Rightarrow less in operating activity
- (iii) Purchase of fixed assets \Rightarrow less in investing activity
- (iv) Interest paid on loans \Rightarrow less in financing activity
- (v) Dividend paid \Rightarrow less in activity
